

Kibet Duncan is a data analyst and technology professional with close to half a decade of experience working in Kenya's tech space. At Safaricom, he focuses on using data to guide innovation, improve digital products, and support decisions that shape how technology serves communities and businesses across the country.

Over the years, he has become a trusted voice on how technology can drive inclusive growth. He delivered a keynote address at the Kenya Sugar Industry Symposium, where he spoke about the role of modern tech in transforming the sugar industry. He has also spoken at ALX Africa during the launch of the ALX Extravaganza, sharing insights on how technology can unlock new opportunities for young people. Most recently, he was part of the Women in Tech Launch by Safaricom, where he emphasized the importance of building a tech ecosystem that opens doors for women and underrepresented groups.

Passionate about innovation, cooperatives, and inclusion, he brings a grounded yet forward-looking perspective to the 12th Annual Kenya Diaspora Homecoming Convention (KDHC) 2025. His work reflects a belief that when youth and women are given access to the right tools, skills, and platforms, technology becomes a powerful engine for shared growth and sustainable development.
